

Report to: Audit Sub-Committee

Subject: Corporate Risk Scorecard

Date: 29th September 2009

Author: Manager of Audit & Risk Services

1. PURPOSE OF REPORT

To update members of the Audit Sub-Committee on the current level of assurance that can be provided against each corporate risk.

2. BACKGROUND

The current Risk Management Strategy was considered and approved by Cabinet in February 2007.

A key deliverable of the Strategy was the development of the Risk Management reporting process, with the key aim of streamlining reports to enhance their use in management's decision making. The Strategy introduced the Corporate Risk Scorecard as a key enabler to this objective.

The Corporate Risk Scorecard provides assurance on the key risks identified as Corporate Risks, which were agreed by SMT in July 2007, and are provided in **Appendix B**.

The assurance opinion is based on reviews of the control environment from the following sources:

- a. Internal Audit,
- b. Management Review of Risk Registers and Supporting Controls,
- c. External Audit,
- d. External Assessment / Accreditation Bodies (e.g. IIP / ISO9000),
- e. Other assurance sources (e.g. Health & Safety).

Existing risks identified in the Authority's strategic and operational risk registers have been aligned in a hierarchy to the agreed Corporate Risks. These will be subject to quarterly review by senior management and on an ongoing basis through the work of Internal Audit.

3. CORPORATE RISK SCORECARD

The Corporate Risk Scorecard and supporting comments, as at September 2009, are provided below.

The methodology and assurance metrics adopted in producing the Corporate Risk Scorecard are provided for reference in **Appendix A**.

An additional issue was raised with respect to the need to sample test the accuracy of departmental pricing arrangements.</p> <p>In addition, 3 medium risk recommendations were made in the Cash Receipting report (IAR0809-08). The key issues relate to the excessive lead times in holding cash within Direct Services prior to transfer to the Civic Centre Cash Office, and the failure to undertake effective reconciliations of cash received at source to the Agresso system.</p> <p><u>Risk Register</u></p> <p>Significant pressure is still prevalent on a number of income streams.</p> <p>There are two risks identified on the Authorities risk register highlighting significant issues. These relate to the ongoing inability to maintain income levels within Leisure Services, and specifically at Leisure Centre's.</p> <p>Income streams within Planning and Environment, both Building and Development Control, are still subject to pressure. Again, the current economic climate is a significant external factor on current income levels.</p> <p>The squeeze on income has been identified on the strategic risk register and is being addressed as part of the corporate budget process for 2009-10, with a number of efficiency measures being considered along with income generation schemes such as the introduction car park charges.</p> <p>The ongoing economic risks are being monitored as part of the process for indications of a worsening or improving climate.</p>

The BCP has</p>

This relates to an ineffective/inadequate energy policy to meet climate change national indicators and LAA priorities. The control gap is the result of a freeze on associated resource posts. A working group has been established to address the reporting issues associated with this indicator.</p> <p>A minor control gap previously aligned to this corporate risk, relating to the failure to maintain the asset management plan (AMP), has been addressed. The draft AMP was formally approved on the 31st March 2009.</p>

	<p><u>Risk Register</u></p> <p>The strategic risk register identifies a minor control gap with respect to failure to deliver efficiencies from the shared services agenda. Ongoing time pressures and delivery of targeted benefits remains the key risks.</p> <p>In addition the Direct Services operational risk register identifies a minor control gap with respect to failure to implement agreed joint working arrangements regarding waste collection. Summary of Control Weaknesses:

Audit Recommendations

The overall level of assurance against this risk category remains unchanged at amber, with 1 outstanding medium risk audit recommendation.

This relates to the need for the Authority to determine its obligations in respect of the Payment Card Industry (PCI) Standards. A consultancy workshop with Capita was undertaken in May 2009, with a report issued in June. Actions are currently being taken to address the minor issues raised in the report. It is expected that this risk will be fully mitigated by the end of October. This will be confirmed in the audit review due to commence in September 2009.

Risk Register

An emerging significant risk has been identified on Direct Services operational risk register. This relates to the potential failure to repair and maintain fencing in recreational areas. The cause of the control gap is identified as inadequate funding. Future budget bids will be submitted.

In addition, an emerging minor control gap has been identified within the Strategy & Performance operational risk register. This relates to the potential failure to deliver housing numbers, including affordable housing. Identified controls include a review of the current affordable housing policy and progression of local development scheme work with conurbation parties and Registered Social Landlord's. However, despite these efforts, the key factor in the short to medium term is likely to be the external environment and specifically the ongoing and worsening economic recession.

Further minor control gaps identified include the need to undertake a review of the Authority's Financial Regulations (Corporate Services) and the inability to effectively maintain and support the Councils Corporate website (Obtree).

This latter risk is due to the software package being at the end of its life cycle and likely to become unsupported by the supplier. A Business Case is being produced to support corporate funding for the replacement of the Content Management System, however, funding is unlikely to be in place until 2010-11.

Assurance Metrics

CORPORATE RISKS			
Assurance Level	No. of o/s Audit Recs. (Med/High)	Risk Register – medium control gaps ^{*1} (number)	Risk Register – high control gaps ^{*2} (number)
RED	16+	7+	2
AMBER	8-15	3-6	1
GREEN	0-7	1-2	0

^{*1} medium risk control gap = -1 to -3

^{*2} high risk control gap = > -3

The control gaps identified from the strategic and operational risk registers are the net result of the calculation ((Inherent risk – Target risk) – Residual risk)) i.e. the gap in control between the target risk and current risk.
