

## **Report to Joint Consultative and Safety Committee**

**Subject:**      Sickness Absence: summary of current trends

**Date:**          30 August 2022

**Author:**       Head of HR, Performance and Service Planning

### **1. Purpose of the Report**

This is an information item to inform the Committee of the current levels of sickness absence in the organisation and to examine trends. Relevant data is shown at Appendix 1; officers will present a verbal report on the context of this data.

As part of the introduction of this item officers will also highlight to the Committee through verbal report, any matters of particular current interest in respect to absence management.

### **2. Recommendation**

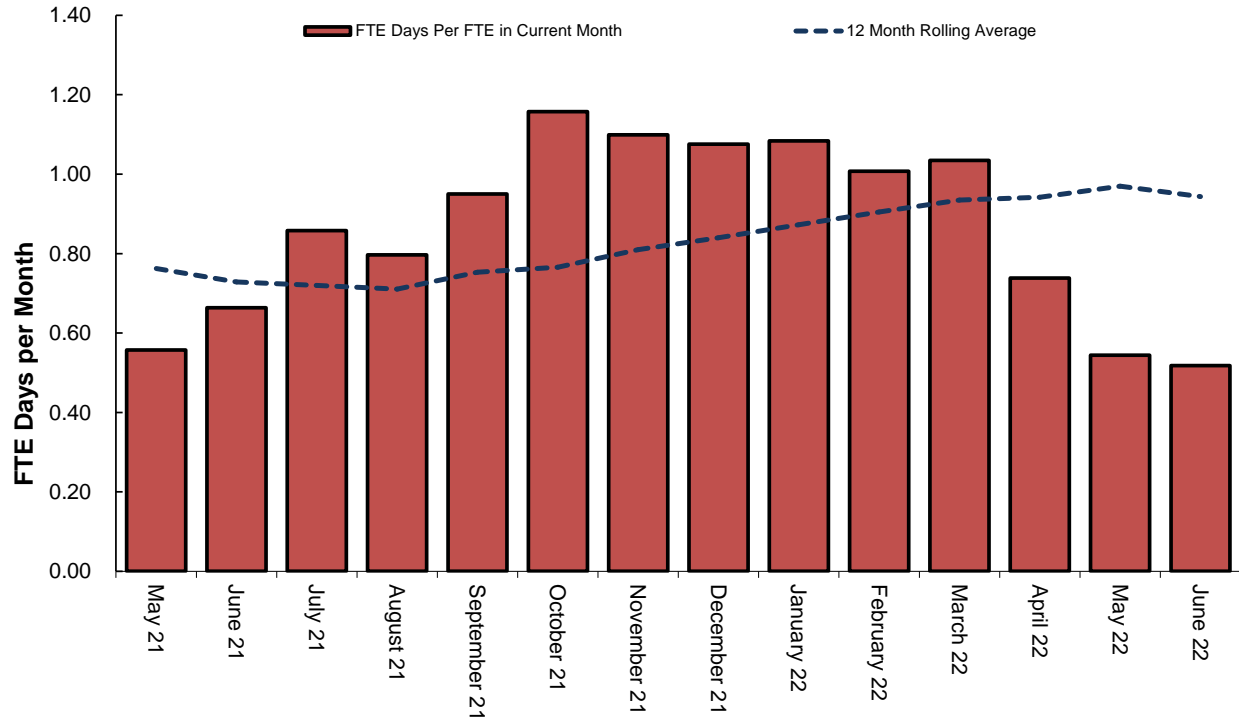

The Committee is asked to note this report.

### **3. Summary of key data**

- The summary of trends graph in Appendix 1 shows that the outturn for the full year up to June 2022 at 11.32 days lost per employee against a target of 9 days.
- During June a total of 11 working days was lost due to Covid. This represents 6% of the absence for that month. In March the number of working days lost due to Covid was 103 out of a total of 386 (26.7% of days lost were due to Covid).
- The rate of absence in June this year (0.52 FTE days lost per FTE) is significantly below the same month last year (0.66 days lost).
- Over the last quarter the number of long-term absence cases has halved from six to three. In December the number of cases was even higher (12 cases). Active case management continues and case management conferences are held between HR and senior managers to help to support a return to work where possible for employees that have had longer absences.
- The overall rate of absence has reduced since last month from a year-to-date level of 11.64 days which was the highest rate of absence for some time.
- Over the rolling year the larger teams that did not hit target were PASC, Customer Services, Leisure, and Transport & Waste.
