1. Introduction

- This Sustainability Appraisal (SA) of potential strategic distribution and logistics sites should be read alongside the SA Report that appraised strategic housing and mixed use sites within the Greater Nottingham Strategic Plan Preferred Approach (January 2023). This SA comprises part of the Greater Nottingham Strategic Plan's SA, following the methodology set out in Preferred Approach SA. The appraisal methodology of strategic sites (Framework 2) and the SA was consulted upon in January and February 2023, this followed previous consultation on the SA Scoping Report.
- 2. Following consultation on the Preferred Approach, it was determined that the plan making authorities should examine whether sites suitable for strategic scale logistics development existed within the plan area. This SA assesses potential sites and determines how these sites perform against the SA's sustainability objectives. The SA does not, by itself, determine whether a site should be allocated, rather it informs site selection, alongside other planning and land use considerations, for example Green Belt policy and local and/or national environmental, social or economic objectives.
- 3. In addition to the SA, which assessed housing and mixed use sites, this SA should be read alongside the Strategic Distribution and Logistics Background Paper, which identifies sites that may be suitable and are preferred as possible allocations, and the Nottingham Core & Outer Housing Market Area Logistics Study (August 2022), which established the need for logistics within the plan area and neighbouring planning authorities of Ashfield, Erewash, Newark and Sherwood and Mansfield.
- 4. The Background Paper assessed a 'pool' of potential sites within the authorities' areas that comprise the Greater Nottingham Planning Partnership (Ashfield, Broxtowe, Erewash, Gedling, Nottingham City and Rushcliffe) and identified those which should be considered as reasonable alternatives, based on criteria which were established within the Logistics Study.
- 5. The reasonable alternative sites within the Greater Nottingham Strategic Plan Area (excluding those within Ashfield and Erewash) identified through the Background Paper have been appraised within the SA.

2. Identification of Reasonable Alternatives

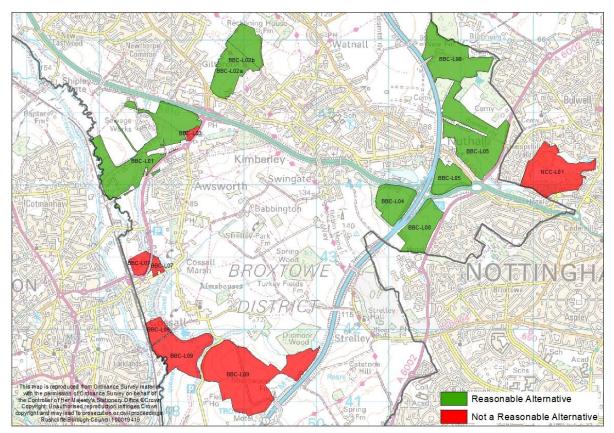

- 6. The assessment of strategic distribution sites has been undertaken separately from general employment sites due to their scale, locational and infrastructure requirements and environmental impacts. Reasonable alternatives were identified from a pool of sites that were either: submitted to the Councils during a call for sites exercise; promoted by landowners for employment and may be suitable for strategic B8 use; or within Strategic Employment Land Assessments. Some sites were previously appraised for mixed use and employment uses within the previous Sustainability Appraisal (December 2022) that supported the Greater Nottingham Strategic Plan Preferred Approach (January 2023).
- 7. The identification of sites as reasonable alternatives was undertaken within the Strategic Distribution Background Paper. This considered each site's:
 - scale (sites should be around 25 hectares or more);
 - access to the strategic highway network; and
 - location (within Areas of Opportunity as identified in the Nottinghamshire Core & Outer HMA Logistics Study).
- 8. This determined whether they were either reasonable alternatives (green) or not reasonable alternatives (red). Only sites that meet all three criteria are determined to be reasonable alternatives.
- 9. Those identified as reasonable alternatives have been assessed against the SA's sustainability objectives within this appraisal.
- 10. The following 'pool' of sites were appraised to determine whether they are reasonable alternatives:

| Authority | Reference | Site name and address |
|-----------|-----------|---|
| Broxtowe | BBC-L01 | Former Bennerley Coal Disposal Point |
| Broxtowe | BBC-L02a | Gilt Hill (smaller site) |
| Broxtowe | BBC-L02b | Gilt Hill (larger site) |
| Broxtowe | BBC-L03 | Gin Close Way |
| Broxtowe | BBC-L04 | Land at Kimberley Eastwood Bye Pass |
| Broxtowe | BBC-L05 | Land at Low Wood Road, Nuthall |
| Broxtowe | BBC-L06 | Land at New Farm Nuthall |
| Broxtowe | BBC-L07 | Land at Shilo Way |
| Broxtowe | BBC-L08 | Land to the south-east of M1 junction 26, Nuthall |
| Broxtowe | BBC-L09 | Land at Waterloo Lane, Trowell |
| | | |
| Gedling | GBC-L01 | West of Kighill Farm, Ravenshead, |
| | | Nottinghamshire |
| Gedling | GBC-L02 | Land at Stockings Farm, Redhill, Arnold, |
| | | Nottinghamshire |
| | | |

| Authority | Reference | Site name and address |
|--------------|-----------|---------------------------------------|
| Nottingham | NCC-L01 | Stanton Tip / Stanton Park |
| City Council | | |
| | | |
| Rushcliffe | RBC-L01 | Ratcliffe-on-Soar Power Station |
| Rushcliffe | RBC-L02 | Rushcliffe 'Gateway' |
| Rushcliffe | RBC-L03 | South of Owthorpe Lane, Cotgrave |
| Rushcliffe | RBC-L04 | Land North of Owthorpe Lane, Cotgrave |
| Rushcliffe | RBC-L05 | Stragglethorpe Junction, |
| Rushcliffe | RBC-L06 | Margidunum |
| Rushcliffe | RBC-L07 | Jerico Farm |
| Rushcliffe | RBC-L08 | Butt Lane (Fosse Way) East Bridgford |
| Rushcliffe | RBC-L09 | Land South of A52, Whatton |
| Rushcliffe | RBC-L10 | Melton Road, Edwalton |

Broxtowe

- 11. Within Broxtowe, ten potential strategic distribution sites were identified. Seven of the sites are considered to be reasonable alternatives and have been subject to an assessment as part of the SA.
- 12. All except BBC-L04, BBC-L07 and BBC-L09 have also been previously assessed as either housing and mixed use sites or employment sites within the Preferred Approach SA (December 2022).

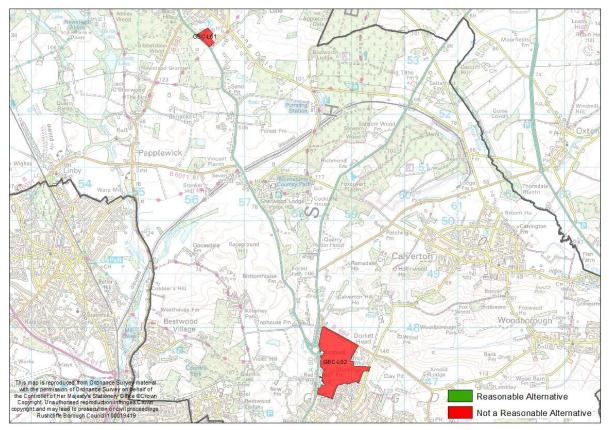

Map 1: Sites appraised within Broxtowe

| Site Site Name Si | | Site Size | Is this a realistic option? |
|-------------------|---|--|---|
| Reference | | | |
| BBC-L01 | Former Bennerley Coal Disposal Point | 68ha | The site is of strategic size, is in an Area of Opportunity and has Site connectivity to the highway network and junction with the M1 (via the A610) |
| BBC-L02a | Gilt Hill (smaller site) | 25ha | The site is of strategic size, is in an Area of Opportunity and has Site connectivity to the highway network and junction with the M1 (via the A610) |
| BBC-L02b | Gilt Hill (larger site) | 42ha (site promoters state 50 | The site is of strategic size, is in an Area of Opportunity and has Site connectivity to the highway network and junction with the M1 (via the A610) |

| Site Reference | Site Name | Site Size | Is this a realistic option? |
|-------------------|--|--|---|
| | | ha, including the smaller site BBC- L02a) | |
| BBC-L03 | Gin Close Way | 1.97ha | The site is too small for strategic distribution. |
| BBC-L04 | Land at Kimberley Eastwood Bye Pass | 22ha | The site is only 3ha below the 25ha recommended site size and has the potential to accommodate a development for strategic distribution. It is in an Area of Opportunity and has site connectivity to the highway network and junction with the M1. |
| BBC-L05 | Land at Low Wood Road, Nuthall | 57ha | The site is of strategic size, is in an Area of Opportunity and has Site connectivity to the highway network and junction with the M1. |
| BBC-L06 | Land at New Farm Nuthall | 41ha | The site is of strategic size, is in an Area of Opportunity and has Site connectivity to the highway network and junction with the M1. |
| BBC-L07 | Land at Shilo Way | 10.07ha (site promoters state 11 ha) | The site is too small for strategic distribution. |
| BBC-L08 | Land to the south-east of M1 junction 26, Nuthall | 25ha | The site is of strategic size, is in an Area of Opportunity and has Site connectivity to the highway network and junction with the M1. |
| BBC-L09 | Land at Waterloo Lane, Trowell | 118.06ha (site promoters state 120 ha) | There is insufficient information provided to assess as a reasonable alternative, including no details of site access. |

Gedling

- 13. Within Gedling, two potential strategic distribution sites were identified. Neither of these sites are considered to be reasonable alternatives.
- 14. Both sites have been previously assessed as potential housing and mixed use sites within the Preferred Approach SA (December 2022) (G01.6A and G07.1PA).

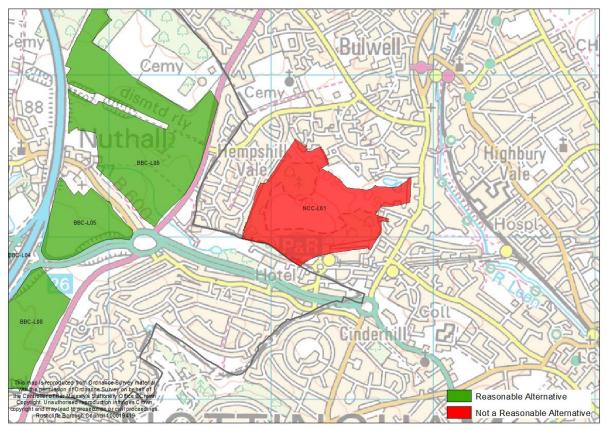

Map 2: Sites appraised within Gedling

| Site ref | Site name | Site size (land remaining) | Is this a realistic option? |
|----------|--|----------------------------------|---|
| GBC-L01 | West of Kighill Farm | 5.45 ha | The site is not being identified as a reasonable alternative for further consideration because it is too small and does not meet the criteria for road access. |
| GBC-L02 | Land at Stockings Farm, Redhill | 10 ha | The site is not being considered as a reasonable alternative for allocation for strategic distribution on the basis that the site is insufficiently large enough and not within a preferred area of search for distribution facilities. The location does |

| Site ref | Site name | Site size (land remaining) | Is this a realistic option? |
|----------|-----------|----------------------------------|---|
| | | | not meet the criteria for having good road access with congestion on the A60 and its associated AQMA being a particular issue. Given the nature of distribution facilities the visual impact on landscape and landscape character is likely to be unacceptable. |

Nottingham City

15. Within Nottingham City only one potential strategic distribution site was identified but it is not considered to be a reasonable alternative. This site, at Stanton Tip (NC1.1PA) has been previously been assessed as a mixed use allocation within the Preferred Approach SA (December 2022).

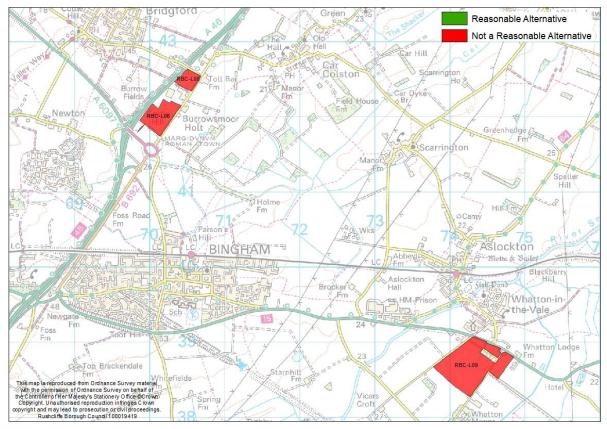

Map 3: Sites appraised within Nottingham City

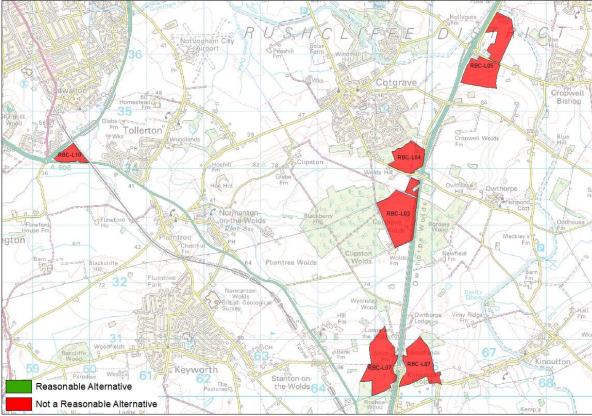

| Site ref | Site name | Site size (land remaining) | Is this a realistic option? |
|----------|-------------|----------------------------------|--|
| NC1.2PA | Stanton Tip | 25 ha | No, the site is not being identified as a reasonable alternative for further consideration. Whilst the site is approximately 42 hectares, the developable area is 25 hectares and is allocated for mixed use. The full 25 hectares is therefore not available and consequently the land available is likely to be considerably below the threshold for strategic distribution. |

Rushcliffe

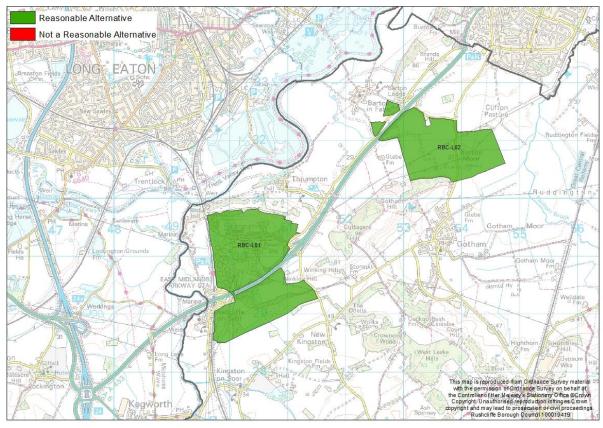

- 16. Within Rushcliffe, ten potential strategic distribution sites have been identified. Three of the sites are considered to be reasonable alternatives and have been appraised.
- 17. All except RBC-L07, RBC-L08 and RBC-L010 have also been previously assessed as employment sites within the Preferred Approach SA (December 2022).
- 18. RBC-L07 has been assessed as a mixed use site (of which it comprises the southern sections, either side of the A46).

Map 4: Sites appraised within Rushcliffe (A46/A52)

Map 5: Sites appraised within Rushcliffe (A46/A606)

Map 6: Sites appraised within Rushcliffe (A453)

| Site ref | Site name | Site size (ha) | Is this a realistic option? |
|----------|---------------------------------------|----------------------|--|
| RBC-L01 | Ratcliffe on Soar Power Station | 265 (gross) | Yes. The site is strategic in size and is well located adjacent to the strategic road network and with good access to it. Part of the site is promoted by the landowner as a location for strategic distribution and 180,000 sqm of logistics development is identified within the draft Local Development Order. |
| RBC-L02 | Nottingham 'Gateway' | 168 | Yes. The site is strategic in size and is well located adjacent to the strategic road network. |
| RBC-L03 | South of Owthorpe Lane | 50 | No. Although located adjacent to the A46, the site is beyond the Areas of Opportunity identified in the Iceni Nottinghamshire Core & Outer HMA Logistics Study. The site's location to the strategic road network is not considered optimal for strategic distribution. |
| RBC-L04 | North of Owthorpe Lane | 23 | No. Although located adjacent to the A46, the site is beyond the Areas of Opportunity identified in the Iceni Nottinghamshire Core & Outer HMA Logistics Study. The site's location to the strategic road network is not considered optimal for strategic distribution. |
| RBC-L05 | Stragglethorpe Junction | 51 | No. Although located adjacent to the A46, the site is beyond the Areas of Opportunity identified in the Iceni Nottinghamshire Core & Outer HMA Logistics Study. The site's location to the strategic road network is not considered optimal for strategic distribution. |
| RBC-L06 | Margidunum Business Park | 14 | No. It is not within an Area of Opportunity as identified in the Iceni Study The site's location to the strategic road network is not considered optimal for strategic distribution. It is not close or adjacent to population centres within the main urban area of Nottingham. The site is likely to include archaeological remains of the Roman town of Margidunum. |
| RBC-L07 | Jerico Farm | 75 | No. It is not within an Area of Opportunity as identified in the Iceni Study. The site's location to the strategic road network is not considered optimal for strategic |

| Site ref | Site name | Site size (ha) | Is this a realistic option? |
|----------|---|----------------------|---|
| | | | distribution. It is not close or adjacent to population centres within the main urban area of Nottingham. |
| RBC-L08 | Butt Lane (Fosse Way), East Bridgford | 5.5 | No. The site is not strategic in size. The site is not located within an Area of Opportunity within the Iceni Strategic Distribution Study. |
| RBC-L09 | Land south of A52 | 40 | No. It is not within an Area of Opportunity as identified in the Iceni Study. The site's location to the strategic road network is not considered optimal for strategic distribution. |
| RBC-L10 | Melton Road, Edwalton | 11 | No. The site is not strategic in size. The site's location to the strategic road network is not considered optimal for strategic distribution. |

Summary

- 19. Due to the absence of sites with a developable area greater than 25 hectares, no reasonable alternative strategic distribution sites have been identified in Gedling or Nottingham City. The sites in Gedling are also constrained by their locations outside areas of opportunity (adjacent to junctions on the M1, A453, and A1/A46), and lack of access to dualled strategic highway network.
- 20. Within Broxtowe, there are a number of sites adjacent to Junction 26 of the M1, in close proximity, or could access this junction via the strategic highway network. With the exception of two sites that are too small, these are considered reasonable alternatives. One site below the recommended minimum site size (BBC-L04) has been identified as a reasonable alternative as it is only 3ha below this threshold. This site is directly adjacent to Junction 26 of the M1. The large site at Waterloo Lane is not considered a reasonable alternative due to uncertainties that it can access a dualled highway network (and the M1) or gain access directly to M1 via the Trowell Services junction.
- 21. In Rushcliffe, although the pool of sites appraised is more geographically spread, they are located along the strategic road network (the A453, A46 and A52). Both sites along the A453 are of a sufficient size and are located within an Area of Opportunity with either having existing access onto the A453 and M1 (at junction 24) (Ratcliffe on Soar Power Station) or the possibility of accessing this dualled strategic highway (Nottingham Gateway). The remaining sites, along the A46 and A52 are beyond the areas of opportunity along the M1, A453, or the A46/A1 at Newark. In addition, some are too small and those on the A52 would rely on single carriageway roads to access the A46, M1 or A1.

22. Across the Greater Nottingham Strategic Plan area, the following sites are considered reasonable alternative strategic logistics sites. These have been assessed against the SA objectives.

| Authority | Reference | Site name and address |
|------------|-----------|---|
| Broxtowe | BBC-L01 | Former Bennerley Coal Disposal Point |
| Broxtowe | BBC-L02a | Gilt Hill (smaller site) |
| Broxtowe | BBC-L02b | Gilt Hill (larger site) |
| Broxtowe | BBC-L04 | Land at Kimberley Eastwood Bye Pass |
| Broxtowe | BBC-L05 | Land at Low Wood Road, Nuthall |
| Broxtowe | BBC-L06 | Land at New Farm Nuthall |
| Broxtowe | BBC-L08 | Land to the south-east of M1 junction 26, Nuthall |
| Rushcliffe | RBC-L01 | Ratcliffe-on-Soar Power Station |
| Rushcliffe | RBC-L02 | Nottingham 'Gateway' |

3. Appraisal of the Reasonable Alternatives

- 23. The SA Framework against which the reasonable alternative sites are assessed can be found in Appendix A. It asks specific questions that establish whether the site's development for logistics would assist or not the achievement of each of the 16 SA objectives and scoring criteria that determine whether the site would have a: major positive; minor positive; uncertain or no impact; minor negative; or major negative effect.
- 24. The conclusions of their effects are explained within a commentary and where appropriate mitigation measures are proposed that would help address any negative effects that are identified. These measures may be included within policies in the Greater Nottingham Strategic Plan.

Summary

- 25. Below is a summary of each site's effects or contribution to the achievement of the SA objectives. The full appraisal of the seven reasonable alternative sites in Broxtowe is included in Appendix B. The full appraisal of the two reasonable alternative sites in Rushcliffe is included in Appendix C.
- 26. All the reasonable alternative sites scored neutral against the housing objective as none are providing new homes.
- 27. Similarly, all the sites scored either positive or major positive against the employment and economic objectives. This is unsurprising given the strategic level of employment development proposed. The two smaller sites at Gilt Hill and Kimberley Eastwood Bye Pass however, being smaller sites, do not score so favorably against these objectives.
- 28. Appraised against the shopping centres objectives, none are located within a town or local centre or have an opportunity to directly improve the vitality or viability of existing centres. They are, with the exception of Land at Kimberley Eastwood Bye Pass, within 20 minutes of travel time from a centre by public transport, walking or cycling and consequently would have a minor positive effect. The "Land at Kimberley Eastwood Bypass site is not served by existing public transport or footpaths.
- 29. In terms of access to healthcare and promoting healthy lifestyles, again with the exception of the Land at Kimberley Eastwood Bye Pass site, all are within 30 minutes' travel time of health facilities. The Gilt Brook sites and Land to the south-east of Junction 26 are however within 400m of a surgery and score major positive as a result.
- 30. Against the social inclusion objective, the sites in Broxtowe (again with the exception of the Land at Kimberley Eastwood Bye Pass site) are in or adjoin areas of deprivation and have scored higher (minor negative) than those in Rushcliffe (neutral). However, the Nottingham Gateway site is only separated from Clifton, which contains areas of high deprivation by the Clifton South (Fairham Pastures) mixed use allocation which is currently under construction.

| | | 1. Housing | 2. Employment and jobs | Economic structure and innovation | 4. Shopping centres | 5. Health and well-being | 6. Community safety | 7. Social inclusion | 8. Transport | 9. | RBC-L02 | Nottingham 'Gateway' | 0 | ++ | ++ | + | + | ? | 0 | ++ | | ? | ? | - | - | - | - | |

- 31. As a result of their location adjacent to existing public transport routes that enable access to local centres and main built up areas, with the exception of two sites, all sites scored major positive against the transport objective. In addition to their accessibility for employees, two sites could also utilise existing adjacent rail infrastructure that would facilitate the transportation of freight by rail. This is a significant benefit that is not captured by their major positive appraisal. The transportation of freight by road would reduce the site's carbon emissions and impacts of HGV movements on the local area. These sites are Former Bennerley Coal Disposal Point, where a spur line once existed and rail bridge remains over the River Erewash and into the site. The second site, at the Ratcliffe on Soar Power Station, has an existing rail line which delivers coal. The adopted LDO allows for the retention of this line. The potential for rail access should be given considerable weight when selecting sites for allocation and, if allocated, it should be secured within site's policy requirements.
- 32. Given their scale and locations all sites result in the loss of greenfield land. However, two sites include significant areas of brownfield land. Consequently, these two sites, Former Bennerley Coal Disposal Point and Ratcliffe Power Station score minor positive.
- 33. Only one site scored positively against the energy and climate change objective, Ratcliffe on Soar Power Station. As set out in the LDO, this site will be developed for: renewable energy and storage; advanced manufacturing and industrial uses such as 'gigafactories' for electric vehicle or battery manufacture and decarbonisation technology to support transition to net zero; and research and development. However, not captured within the appraisal of the sites against this objective is the contribution rail access will also make to the transition to a low carbon economy. This is identified within the mitigation text.
- 34. Four sites scored negatively against the air quality objective, these are the Gilt Hill sites and the two sites north east of Junction 26 of the M1 at Low Wood Road and New Farm. These two sites are partly within Nottingham's <u>NO2</u> <u>Agglomeration Zone</u>.
- 35. Regarding flooding and the avoidance or reduction of flood risks, the majority of the sites scored negatively as a result of their size and the presence of surface water flooding or more significantly limited areas within flood zones 2, 3a or 3b. Four sites, all located within Broxtowe at Junction 26 of the M1, would have major positive or neutral effect against this objective as they are outside areas at risk of flooding. No sites were considered major adverse (i.e. where the majority of a site is within flood zone 2 or 3 and/or at high risk of surface water flooding).
- 36. All sites scored negatively when appraised against the natural environment reflecting their size and the likely adverse impacts on priority habitats, including hedgerows, trees and woodland. Those that scored major negative included designated sites, notably local wildlife sites and or the presence of Sites of Special Scientific Interest in close proximity. The Low Wood Road and New Farm sites (north east of Junction 26 of the M1 in Broxtowe) contain a number of local wildlife sites and are in close proximity of Sellers Wood SSSI and scored major negative as a result. The Former Bennerley Coal Disposal Point also

scored major negative due to its location within an important Blue and Green Infrastructure Network, the Erewash Valley, which it would bisect. The site itself contains open space and local wildlife site.

- 37. Similarly, apart from the Ratcliffe on Soar Power Station all sites also scored negatively against the landscape objective, given their size and likely impact of large distribution 'sheds'. The smaller and larger site at Gilt Hill, both however scored major negative as a result of their rising topography and rural tranquility. The removal of the power station, including cooling towers would have a positive impact on the landscape, however an overall positive score would depend on the replacement buildings and the landscape and visual impact of development south of the A453. Consequently, effects on this objective are uncertain.
- 38. The majority of sites would have a neutral or uncertain/unknown impact on the built and historic environment due to absence of heritage assets within the site or close proximity, or the possibility of archaeological remains. The Bennerley site however may have a major negative effect on the setting of the Bennerley Viaduct which is a Grade II* listed building. These effects will depend on the proposed development, but could be reduced to minor negative through avoidance and mitigation measures, that may include locating larger structures where they would not adversely impact the setting of the viaduct. The Power Station and Nottingham Gateway Sites, due to their location within the Trent Valley do have a greater number of recorded archaeological assets within them or in close proximity, including Scheduled Ancient Monuments that date back to Roman Britain and records of Iron Age settlements. Consequently, both these sites scored minor negative.
- 39. Against the final objective, natural resources, as with the biodiversity objective, all the sites scored negatively, however those that contained higher grade agricultural land were deemed to have a major negative impact. These included the Kimberley Eastwood Bye Pass, Low Wood Road, New Farm, Land South-East of Junction 26, Ratcliffe on Soar Power Station and Nottingham Gateway.

4. Appraisal of the Preferred Sites

- 40. The Preferred Approach proposes that the following sites should be allocated for strategic distribution and logistics development:
 - BBC-L01 Former Bennerley Coal Disposal Point
 - RBC-L01 Ratcliffe on Soar Power Station
- 41. The selection of these sites has been informed by the SA assessments, in conjunction with wider assessments contained within the separate Background Paper.

BBC-L01 Former Bennerley Coal Disposal Point

- 42. Similarly to all the alternative sites, this site scored positively against the majority of the SA's objectives, notably those regarding employment and the economy, social inclusion, health and transport.
- 43. Where this site performed better than the other sites (with the exception of the Power Station site) was against the brownfield land objective, and although it is not recognised in the site's performance against the climate change objective, the site's ability to access the rail network is a considerable benefit that would enable the delivery of low carbon freight transportation.
- 44. Although minor negative, the site would have less effects on landscape and would result in no loss of high grade agricultural land.
- 45. It must be recognised however, that the site's location adjacent to the Bennerley Viaduct within the River Erewash Valley could, if not mitigated, could result in major adverse effects upon the Grade II* listed structure and a primary blue and green infrastructure network. If allocated, these issues should be adequately addressed within site specific policies in the Greater Nottingham Strategic Plan.

RBC-L01 Ratcliffe on Soar Power Station

- 46. The Ratcliffe on Soar Power Station Site also scored well against the employment and the economy, social inclusion, health and transport objectives.
- 47. As with the Bennerley Site, the site includes areas of brownfield land and the regeneration of the power station offers opportunities to improve the landscape and visual amenity over a wide area. It also has an existing rail access and this should be retained. The site therefore offers an opportunity for local and wider environmental benefits, including addressing climate change.
- 48. The site's performance against the energy and climate change objective is strengthened by the adopted LDO that included onsite renewable energy, energy storage and low carbon and net zero technologies research and manufacturing.

- 49. The presence of known archaeological remains around Redhill and the likelihood that these may extend further across the site are a minor negative, as are areas that are at risk of surface water flooding and the existence of priority habitats. If allocated, these issues should be adequately addressed within site specific policies in the Greater Nottingham Strategic Plan.
- 50. The Preferred Approach consultation document includes site information but does not include proposed policies for the preferred strategic logistics sites. The proposed policies for strategic sites will be included in the Publication Draft of the Greater Nottingham Strategic Plan. The final Sustainability Appraisal report at the formal Publication Draft consultation stage will cover the appraisals on the proposed policies for all strategic sites, including housing and mixed use sites.

Appendix B: Appraisal of Reasonable Alternative Sites in Broxtowe

| Factors | Details |
|----------------------------|---|
| SHLAA reference | 333, 432 |
| Size | 68ha |
| No of dwellings/ estimated | Up to approximately 74,000 square metres (Owners/promoters' estimate, i.e. "up to |
| employment floorspace | 800,000 sqft") |
| Existing Use | Agriculture and former disposal point |

BBC-L01 – Former Bennerley Coal Disposal Point

Refer to matrix for scoring criteria

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|--|---|-------|---|---|
| 1. Housing To ensure that the housing stock meets the housing needs, including gypsies, travellers and travelling showpeople. | Is the site allocated for housing? Will it meet the housing need? | 0 | Site is not currently allocated or used for housing and is being considered for Strategic Distribution. Separately considered for housing (B06.2PA). | |
| 2. Employment and Jobs To create employment opportunities. | Will the site provide jobs? Will the site provide job opportunities for unemployed people? | ++ | The site would provide a strategic level of jobs (500+) adjacent to a key settlement. The site is not located within a deprived area (10% worst | Require employment and skills strategy and apprenticeships for local people during construction. |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|---|--|-------|---|--|
| | Will the site provide new job opportunities in areas of deprivation? | | area), but it is adjacent to two of the 10% most deprived Lower Super Output Areas, within the adjacent Erewash Borough Council area (Cotmanhay – Hopewell Farm and Cotmanhay – Bennerley Av Nelson St). | Ensure there are active travel links from adjacent settlements to the site. Ensure development includes new employment opportunities for unemployed people. |
| 3. Economic Structure and Innovation To provide the physical conditions for a modern economic structure including infrastructure to support the use of new technologies. | Is the site allocated for employment, retail or mixed use? Is the site allocated for specific employment uses e.g. office-based? Will the site involve the loss of employment, retail or mixed use land? Is the site for new educational buildings? Is the site allocated for | ++ | The site will provide a strategic level of employment land / buildings for logistics on one site adjacent to a key settlement. The development of the site would not involve the loss of employment, retail or mixed use. The site is not for new educational buildings or live- work units. | |
| 4. Shopping Centres Increase the vitality and | mixed live-work units? Is the site allocated for town centre uses or mixed use in the shopping centre? | + | The site is not proposed for town centre uses or mixed use and does not fall within an existing shopping centre. | Ensure development enhances connectivity with existing centres. This may include links to Eastwood and Kimberley. |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|--|---|-------|---|--|
| viability of existing shopping centres. | Is the site within 400 metres of a shopping centre e.g. city centre, district centre or local centre? Will the site result in a loss of town centre use or mixed use in a shopping centre? | | There is access to Kimberley town centre within 30 minutes travel time by public transport: Monday – Saturday hourly bus service to Kimberley (within 10 minutes) and Ilkeston (again within 10 minutes) from bus stops along Gin Close Way, operated by Notts and Derby Traction (route 27). | |
| | | | There would be no loss of a town centre use or mixed use. | |
| 5. Health and Well-Being To improve health and well- being and reduce health inequalities. | Is the site within 30 minutes travel time of a health facility? Is the site within 400 metres walking distance of a recreational area or accessible blue-green infrastructure e.g. country parks, open spaces, playing fields, allotments, watercourses? Will the site result in a loss of recreational area or | + | There is access to health facilities in Eastwood and Kimberley which are within 30 minutes travel time by public transport: Monday – Saturday hourly bus service to Kimberley (within 10 minutes) and Ilkeston (again within 10 minutes) from bus stops along Gin Close Way, operated by Notts and Derby Traction (route 27). Hama Medical Centre is located in Kimberley. Medical facilities in Ilkeston include Old Station Surgery | Ensure any development enhances connections into nearby recreational area or accessible blue-green infrastructure. Enhance links to nearby town centres where health facilities are accessible. |
| | of recreational area or accessible blue-green | | include Old Station Surgery. | |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|--|--|-------|---|--|
| | infrastructure e.g. country parks, open spaces, playing fields, allotments, watercourses? | | There are recreational spaces within close proximity to the site: Open Spaces: Nottingham Canal (Awsworth) Om from site Shilo Recreation Ground 48m from site A610 Sports Ground 66m from site Smithurst Road Open Space Part 2 98m from site Meadow Road Open Space 166m from site A large part of the site is used for informal open space / Local Wildlife Sites which may be lost as a result of any development. | |
| 6. Community Safety To improve community safety, reduce crime and the fear of crime. | Will the site be designed to contribute to a safe secure built environment through designing out crime? | ? | Uncertain as the impact of development upon crime is dependent upon design and a series of secondary factors not related to site allocation. It is understood that there have been reports of anti-social behaviour at the current site. | Ensure policies in the Local Plan in general promote a safe secure environment for new development. |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|---|---|-------|---|---|
| 7. Social Inclusion To promote and support the development and growth of social capital and to improve social inclusion and to close the gap between the most deprived areas within the plan area. | Is the site within 400 metres walking distance of community facilities e.g. post office, community centres, leisure centres, libraries, schools etc.? Will the site result in a loss of a community facility? Is the site located in or adjoining a deprived area? | ++ | Development on site would not lead to the loss of a community facility. The site is within 30 minutes (by bus) of community facilities. Please refer to the transport objective. The site is not located within a deprived area (10% worst area), but it is adjacent to two of the 10% most deprived Lower Super Output Areas, within the adjacent Erewash Borough Council area (Cotmanhay – Hopewell Farm and Cotmanhay – Bennerley Av Nelson St). | Ensure community facilities to support the development are provided. Ensure there are enhanced links to adjacent areas where there are higher levels of deprivation. |
| 8. Transport To make efficient use of the existing transport infrastructure, help reduce the need to travel by car, improve accessibility to jobs and services for all and to | Is the site accessible by public transport? Is the site located in or adjoining the main built up area and has direct route(s) from the site to existing businesses and shopping centres? | ++ | The site has the potential to make use of existing rail infrastructure to the west. The site is in close proximity to existing bus stops: Bus Stops: Gin Close Way 24m from site Gin Close Way 38m from site Barlborourgh Road 263m from site | Ensure connectivity to the site by non-car modes including connectivity to Bennerley Viaduct. Provide connectivity to existing rail infrastructure to reduce goods vehicle trips by road. |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|--|---|-------|---|--|
| 1. Housing To ensure that the housing stock meets the housing needs, including gypsies, travellers and travelling showpeople. | Is the site allocated for housing? Will it meet the housing need? | 0 | Site is not currently allocated or used for housing and is being considered for Strategic Distribution. Separately considered for housing (B05.1PA) | |
| 2. Employment and Jobs To create employment opportunities. | Will the site provide jobs? Will the site provide job opportunities for unemployed people? | ++ | The site would provide a strategic level of jobs (1000+) adjacent to the main built up area. The site is not located within a deprived area (10% worst area), but it is adjacent to one | Ensure development includes new employment opportunities for unemployed people. Require employment and skills strategy and apprenticeships for local people during construction. |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|---|--|-------|---|--|
| | Will the site provide new job opportunities in areas of deprivation? | | of the 10% most deprived Lower Super Output Areas, within the adjacent Nottingham City Council area. | |
| 3. Economic Structure and Innovation To provide the physical conditions for a modern economic structure including infrastructure to support the use of new technologies. | Is the site allocated for employment, retail or mixed use? Is the site allocated for specific employment uses e.g. office-based? Will the site involve the loss of employment, retail or mixed use land? Is the site for new educational buildings? Is the site allocated for mixed live-work units? | ++ | The site will provide a strategic level of employment land / buildings for logistics on one site adjacent to the main built up area. The development of the site would not involve the loss of employment, retail or mixed use. The site is not for new educational buildings or live- work units. | |
| 4. Shopping Centres Increase the vitality and viability of existing shopping centres. | Is the site allocated for town centre uses or mixed use in the shopping centre? Is the site within 400 metres of a shopping centre e.g. city centre, | + | The site is not proposed for town centre uses or mixed use and does not fall within an existing shopping centre. Frequent bus services along Nottingham Road (every 10 minutes) between Kimberley, | Ensure development enhances connectivity with existing shopping centres. |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|--|--|-------|--|--|
| | district centre or local centre? Will the site result in a loss of town centre use or mixed use in a shopping centre? | | Nuthall and onwards to Nottingham City Centre – Victoria Bus Station – adjacent to the Victoria Centre (within 30 minutes). Kimberley can be accessed by bus within 5 minutes by Trent Barton's Rainbow One route. There would be no loss of a town centre use or mixed use. | |
| 5. Health and Well-Being To improve health and well- being and reduce health inequalities. | Is the site within 30 minutes travel time of a health facility? Is the site within 400 metres walking distance of a recreational area or accessible blue-green infrastructure e.g. country parks, open spaces, playing fields, allotments, watercourses? Will the site result in a loss of recreational area or accessible blue-green infrastructure e.g. country parks, open spaces, | + | Frequent bus services along Nottingham Road (every 10 minutes) between Kimberley, Nuthall and onwards to Nottingham City Centre (within 30 minutes). Kimberley can be accessed by bus within 5 minutes by Trent Barton's Rainbow One route. Medical facilities in Kimberley include the Hama Medical Centre. Assarts Farm Medical Centre 650m from site (within 30 minute travel time) Open Spaces | Ensure any development enhances connections into nearby recreational area or accessible blue-green infrastructure Avoid developing areas covered by SSSI or Local Wildlife Site designations. |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|--|--|-------|--|--|
| | playing fields, allotments, watercourses? | | 2.12% (1.21ha) of site in Low Wood (Restricted Access: Natural and Semi-Natural Green Space) Proposed Green Infrastructure Corridors (a: within site) 125.45m of 2.15 Sellers Wood and New Farm Wood bisects site 261.06m of 2.7 Nuthall Cutting and Kimberley Railway bisects site | |
| 6. Community Safety To improve community safety, reduce crime and the fear of crime. | Will the site be designed to contribute to a safe secure built environment through designing out crime? | ? | Uncertain as the impact of development upon crime is dependent upon design and a series of secondary factors not related to site allocation. | Ensure policies in the Local Plan in general promote a safe secure environment for new development. |
| 7. Social Inclusion To promote and support the development and growth of social capital and to improve social | Is the site within 400 metres walking distance of community facilities e.g. post office, community centres, leisure centres, libraries, schools etc.? | ++ | The current use of the site is agricultural use so development on site would not lead to the loss of a community facility. Community facilities within 400m of the site: | |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |

| | | | Ancient woodland on the edges of the site and vegetation associated with the dismantled railway are indicative of conservation value. Views are limited to field extents by hedgerows. Woodland within the area of search along the route of a dismantled railway has potential to be tied into development. Existing field boundaries form defensible boundaries to development. There is however potential for the coalescence of Nuthall and Bulwell if all of the area of search is developed which should be avoided. | |
| | | | The Part 2 Local Plan Landscape and Visual Analysis of Potential Development Sites Study scored Character Area LS30 – Land North of the Dismantled Railway / South of New Farm Lane (which covers the site) as: | |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|---|---|-------|--|--|
| | | | Landscape value – Amber Visual Value – Amber Landscape Susceptibility – Amber Visual Susceptibility – Amber Landscape Sensitivity – Amber Visual Sensitivity – Amber Visual Sensitivity – Amber Any potential development on a greenfield site is likely to have an adverse impact on landscape character. It is unknown at this stage as to whether a new landscape character could be created or whether any features could be conserved, enhanced or restored. | |
| 15. Built and Historic Environment To protect and enhance the townscape character and enhancing the place through good design. To conserve | Will it result in development that is sympathetic to its surrounding in terms of design, layout and scale? Will it result in a loss of or harm the significance of designated or non- designated heritage asset(s) or its setting? | ? | Local Interest Buildings (within site): Small part of New Farm. The details of any proposed development would not be known until the planning application stage. Development at the site would be unlikely to enhance or better reveal the significance of | Detailed heritage assessments could be undertaken at the planning application stage. |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|---|--|-------|---|--|
| designated and non-designated heritage assets and their setting and provide better opportunities for people to enjoy culture and heritage. | Will it enhance or better reveal the significance of the heritage asset? Will it promote heritage based tourism or heritage led regeneration? Will it lead to the adaptive reuse of a heritage asset? | | any heritage assets. It would be unlikely to promote heritage based tourism or regeneration. There are no known heritage assets on the site which would be likely to be potential candidates for reuse. | |
| 16. Natural Resources and Waste Management To prudently manage the natural resources of the area including soils, safeguarding minerals and waste. | Is the site on high grade agricultural land:- - Grade 1 (excellent) - Grade 2 (very good) - Grade 3a (good) - Grade 3b (moderate) - Grade 4 (poor) - Grade 5 (very poor)? Will it lead to a loss of best and most versatile (BMV) agricultural land (agricultural soil grades 1, 2 and 3a)? Will the site reduce household and commercial waste per head? | | Development on site would likely increase waste per head. Agricultural Land Classification: 45% of site in GRADE 3 55% of site in GRADE 2 Based upon the Minerals Local Plan Policies Map, there are no known mineral reserves at the site which would be sterilised. | Ensure development avoids areas that are classified as good agricultural land. |

|---------------|--|-------|------------|------------|
| | Will it sterilise mineral | | | |
| | reserves which can be viably extracted? | | | |

BBC-L08 – Land to the south-east of M1 Junction 26, Nuthall

| Factors | Details |
|----------------------------|---|
| SHLAA reference | SHLAA/00107/AVA |
| Size | 25ha |
| No of dwellings/ estimated | Approximately 83,000 square metres. |
| employment floorspace | (Owners/promoters' estimate, i.e. "895,000 square feet".) |
| | (Owners/promoters describe this as being for "industrial / logistics".) |
| Existing Use | Agricultural |

Refer to matrix for scoring criteria

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|--|---|-------|--|--|
| 1. Housing To ensure that the housing stock meets the housing needs, including gypsies, travellers and travelling showpeople. | Is the site allocated for housing? Will it meet the housing need? | 0 | Site is not currently allocated or used for housing. Separately considered for housing (B08.3PA). | |
| 2. Employment and Jobs To create employment opportunities. | Will the site provide jobs? Will the site provide job opportunities for unemployed people? | ++ | The site would provide a strategic level of jobs (500+) adjacent to the main built up area. The site is not located within a deprived area (10% worst | Ensure development includes new employment opportunities for unemployed people. Require employment and skills strategy and apprenticeships |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|---|--|-------|---|--|
| | Will the site provide new job opportunities in areas of deprivation? | | area), but it is adjacent to one of the 10% most deprived Lower Super Output Areas, within the adjacent Nottingham City Council area. | for local people during construction. |
| 3. Economic Structure and Innovation To provide the physical conditions for a modern economic structure including infrastructure to support the use of new technologies. | Is the site allocated for employment, retail or mixed use? Is the site allocated for specific employment uses e.g. office-based? Will the site involve the loss of employment, retail or mixed use land? Is the site for new educational buildings? Is the site allocated for mixed live-work units? | ++ | The site will provide a strategic level of employment land / buildings for logistics on one site adjacent to the main built up area. The development of the site would not involve the loss of employment, retail or mixed use. The site is not for new educational buildings or live- work units. | |
| 4. Shopping Centres Increase the vitality and viability of existing shopping centres. | Is the site allocated for town centre uses or mixed use in the shopping centre? Is the site within 400 metres of a shopping centre e.g. city centre, | + | The site is not proposed for town centre uses or mixed use and does not fall within an existing shopping centre. Mornington Crescent Local Centre 100m from site | Ensure development enhances connectivity with existing shopping centres. |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|---|--|-------|--|--|
| | district centre or local centre? Will the site result in a loss of town centre use or mixed use in a shopping centre? | | Frequent bus services along Nottingham Road (B600) (every 10 minutes) between Kimberley, Nuthall and onwards to Nottingham City Centre – Victoria Bus Station – adjacent to the Victoria Centre (within 30 minutes). Kimberley can be accessed by bus within 10 minutes by Trent Barton's Rainbow One route. There would be no loss of a town centre use or mixed use. | |
| 5. Health and Well-Being To improve health and well-being and reduce health inequalities. | Is the site within 30 minutes travel time of a health facility? Is the site within 400 metres walking distance of a recreational area or accessible blue-green infrastructure e.g. country parks, open spaces, playing fields, allotments, watercourses? Will the site result in a loss of recreational area or accessible blue-green | ++ | Frequent bus services along Nottingham Road (B600) (every 10 minutes) between Kimberley, Nuthall and onwards to Nottingham City Centre (within 30 minutes). Kimberley can be accessed by bus within 10 minutes by Trent Barton's Rainbow One route. Medical facilities in Kimberley include the Hama Medical Centre. Assarts Farm Medical Centre 100m from site | Ensure any development enhances connections into nearby recreational area or accessible blue-green infrastructure. |

| | Will the site help people adapt to climate change? | | | |
| | Will the site maintain or increase the provision of ecosystem services on which local people depend, including water, food, and materials, now and under future climates? | | | |
| 11. Pollution and Air Quality To manage air quality and minimise the risk | Is site within the Nottingham Urban Area agglomeration zone? | ? | The site is not within the Nottingham Urban Area Agglomeration Zone. | Major public transport improvements. |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|---|--|-------|---|---|
| posed by air, noise and other types of pollution. | Will the site cause additional harm to an existing Air Quality Management Area? Is it likely to create a new Air Quality Management Area? | | It is not within or adjacent to an existing Air Quality Management Area. Insufficient information is available at this stage to determine any impacts upon air quality. | Ensure development includes measures to reduce travel by car and provision for EV usage. |
| 12. Flooding and Water Quality To minimise the risk of flooding and to conserve and improve water quality. | Is the site within or adjacent EA Flood Zone:- - 1 (Low Probability); - 2 (Medium Probability); - 3a (High Probability); or - 3b (The Functional Floodplain)? Will it deteriorate river habitat in-stream and the riparian zone adjacent floodplain habitats? Will the site cause any harm to the Source Protection Zone or the water environment? Can surface water run-off be appropriately managed without increasing flood risk elsewhere? | ++ | The site is in Environment Agency Flood Zone 1 and is at low risk of surface water flooding. | Ensure surface water management/mitigation measures including SuDS (limiting impermeable surfaces and promoting porous surfaces, swales and attenuation ponds) to address surface water run-off are secured within the site. |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|---|--|-------|---|---|
| 13. Natural Environment, Biodiversity and Blue-Green Infrastructure To increase biodiversity levels and protect and enhance blue- green infrastructure and the natural environment. | Will it meet the biodiversity net gain requirements? Will it result in a loss of all or part of or impact on a designated site of nature conservation interest? Is the site adjacent to a designated site of nature conservation interest? Will it involve the loss of existing habitats or trees/ hedgerows/woodland or loss of connectivity? Will the site include the provision of on-site or off- site open space? Will the site involve the loss of existing open space? Will the site improve the underused or undervalued open space? | | It is expected that the site would meet the biodiversity net gain requirements. Development on site would result in the loss of existing trees and hedgerows. The current use of the site is agricultural use so there would not be a loss of open space. There is a Local Wildlife Site within the site and two within 250m of it. Local Wildlife Sites (within site): 4.27% (1.39ha) of site in M1 Woodland (5/755 A notable coal-measures woodland) Proposed Green Infrastructure Corridors (within site): 460.13m of 2.6 A610 Swingate crosses site | Requirement for at least 10% biodiversity net gain, with on- site provision a priority as it is a greenfield site. Protect and enhance green infrastructure provision. Retain where possible and enhance trees and hedgerows within the site. Ensure onsite and where possible off site open space is retained and enhanced. Avoid developing areas of site covered by the Local Wildlife Site designation. |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|--|--|-------|--|---|
| 14. Landscape To protect and enhance the landscape character. | Will it have an adverse impact on local landscape character? Will it conserve, enhance or restore the features and characteristics of the landscape in the present form? Will it create a new landscape character? | | Greater Nottingham Growth Options Study: Ranking: Amber: Undulating terrain constrained by the A6002 and M1 motorway. Land is composed of medium to large size arable fields, edge of town industrial units. Away from the A6002 and M1 this area is typical of the rural setting and perceptions of tranquillity are high. There are however detractors including the highways network and industrial urban fringe development. Topography and vegetation provides some enclosure. Development may adversely affect views. Defensive boundaries are generally limited to the highway network and existing field boundaries. Topography means that development would be best placed in the south- east and east of the broad area of search, with commercial development potentially suitable in the far north. | Ensure development proposals are supported by appropriate landscape character assessments and design and access statements specifically address landscape impacts. Ensure development retains and utilises existing landscape features and incorporates blue- green infrastructure, sensitive design and layouts to reduce visual intrusion upon the landscape. |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|---------------|-------------------------|-------|--|------------|
| | | | The Part 2 Local Plan Landscape and Visual Analysis of Potential Development Sites Study scored Character Area LS25 - Land between Nottingham Business Park and the A610 Nuthall (which covers the site) as: | |
| | | | Landscape Value – Green Visual Value – Green Landscape Susceptibility – Green Visual Susceptibility – Green Landscape Sensitivity – Green Visual Sensitivity – Green | |
| | | | Any potential development on a greenfield site is likely to have an adverse impact on landscape character. It is unknown at this stage as to whether a new landscape character could be created or whether any features could be conserved, enhanced or restored. | |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|--|--|-------|---|--|
| 15. Built and Historic Environment To protect and enhance the townscape character and enhancing the place through good design. To conserve designated and non-designated heritage assets and their setting and provide better opportunities for people to enjoy culture and heritage. | Will it result in development that is sympathetic to its surrounding in terms of design, layout and scale? Will it result in a loss of or harm the significance of designated or non- designated heritage asset(s) or its setting? Will it enhance or better reveal the significance of the heritage asset? Will it promote heritage based tourism or heritage led regeneration? Will it lead to the adaptive reuse of a heritage asset? | ? | No designated or non- designated heritage assets on the site. Nuthall Conservation Area is within 250m of the site. The details of any proposed development would not be known until the planning application stage. Development at the site would be unlikely to enhance or better reveal the significance of any heritage assets. It would be unlikely to promote heritage based tourism or regeneration. There are no known heritage assets on the site which would be likely to be potential candidates for reuse. | Detailed heritage assessments could be undertaken at the planning application stage. |
| 16. Natural Resources and Waste Management | Is the site on high grade agricultural land:- - Grade 1 (excellent) - Grade 2 (very good) - Grade 3a (good) | | Development on site would likely increase waste per head. | Ensure development avoids areas that are classified as good agricultural land. |

| including soils, safeguarding minerals and waste. | Will it lead to a loss of best and most versatile (BMV) agricultural land (agricultural soil grades 1, 2 and 3a)? | | Based upon the Minerals Local Plan Policies Map, there are no known mineral reserves at the site which would be sterilised. | |
| | Will the site reduce household and commercial waste per head? | | | |
| | Will it sterilise mineral reserves which can be viably extracted? | | | |

Appendix C: Appraisal of Reasonable Alternative Sites in Rushcliffe

| RBC-L01 – Ratcliffe on S | Soar Power Station |
|--------------------------|--------------------|
|--------------------------|--------------------|

| Factors | Details |
|---------------------------------|---|
| Size | 265 (gross) |
| Estimated employment floorspace | 810,000m ² based on draft LDO for the site |
| Existing Use | Coal Fired Power Station and Agriculture |

Refer to matrix for scoring criteria

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|--|---|-------|---|---|
| 1. Housing To ensure that the housing stock meets the housing needs, including gypsies, travellers and travelling showpeople. | Is the site allocated for housing? Will it meet the housing need? | 0 | No impact as the site is not currently allocated or used for housing and is proposed solely for employment or mixed-use development. | |
| 2. Employment and Jobs To create employment opportunities. | Will the site provide jobs? Will the site provide job opportunities for unemployed people? Will the site provide new job opportunities in areas of deprivation? | ++ | The site is not in or adjoining a built-up area. Some existing jobs on the power station will be lost following its decommissioning but the redevelopment of the site has the potential to provide a significant level of jobs (approximately 3,500-4,000 | Ensure development includes new employment opportunities for unemployed people. Require employment and skills strategy and apprenticeships for local people during construction. |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|--|---|-------|---|---|
| | | | assuming 50% reduction due to displacement and leakage), that could include opportunities for unemployed people. | |
| | | | The site is not within an area of deprivation. | |
| | | | | |
| 3. Economic Structure and Innovation To provide the | Is the site allocated for employment, retail or mixed use? | ++ | The site is not allocated and does not adjoint the built-up area or key settlement. | The size of this site and locations offers opportunities to include educational facilities (if required) and/or employment |
| physical conditions for a modern economic | Is the site allocated for specific employment uses e.g. office-based? | | The site is an existing single employment site that is greater than 5ha and could provide a strategic level of employment | space for high knowledge sector. |
| structure including infrastructure to support the use | Will the site involve the loss of employment, retail or mixed use land? | | along with the potential to provide opportunities for training and high knowledge sectors. The draft LDO focusses on renewable energy | |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|--|---|-------|--|---|
| of new technologies. | Is the site for new educational buildings? Is the site allocated for | | and low carbon technologies and includes training facilities. | |
| 4. Shopping Centres Increase the vitality and viability of existing shopping centres. | mixed live-work units? Is the site allocated for town centre uses or mixed use in the shopping centre? Is the site within 400 metres of a shopping centre e.g. city centre, district centre or local centre? | + | No impact on the vitality and viability of the existing centre. The site is however within a 30-minute travel time by public transport, walking and cycling of Kegworth, which is in the neighbouring local authority area of North West Leicestershire. | Consider limiting the number and type of town centre uses within the site, with retail floorspace limited to no more than 280 sqm (net) per unit. |
| | Will the site result in a loss of town centre use or mixed use in a shopping centre? | | | |
| 5. Health and Well-Being To improve health and well- being and reduce health inequalities. | Is the site within 30 minutes travel time of a health facility? Is the site within 400 metres walking distance of a recreational area or accessible blue-green infrastructure e.g. country parks, open spaces, | + | The centre of the site is within 30 minutes travel time by bus, car and bicycle from the health facilities in Gotham and Kegworth. The site is not within 400 metres walking distance a recreation area or accessible BGI (excluding footpaths). | Ensure existing public footpaths on the south side of the A453 are appropriately diverted and enhanced. Ensure new/improved pedestrian and cycleway links are provided to West Bridgford, Clifton and Barton in Fabis. |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|--|--|-------|--|---|
| | playing fields, allotments, watercourses? Will the site result in a loss of recreational area or accessible blue-green infrastructure e.g. country parks, open spaces, playing fields, allotments, watercourses? | | The site would not result in the loss of a recreation area or accessible BGI, although public footpaths on the area to the south of the A453 would require diversion. The allocation/ development of the site could potentially provide opportunities for new/improved pedestrian and cycling links to be created along the green corridor infrastructure no.3 identified in Table D1 of Appendix D of the Rushcliffe Local Plan Part 2. | |
| 6. Community Safety To improve community safety, reduce crime and the fear of crime. | Will the site be designed to contribute to a safe secure built environment through designing out crime? | ? | Uncertain as the impact of development upon crime is dependent upon design and a series of secondary factors not related to site allocation. | Ensure policies in the Local Plan in general promote a safe secure environment for new development |
| 7. Social Inclusion To promote and support the development and growth of social capital and to improve social | Is the site within 400 metres walking distance of community facilities e.g. post office, community centres, leisure centres, libraries, schools etc.? | 0 | The site is not within 400 metres of community facilities but would not result in the loss of such facilities. The site is not in or adjoining an area of deprivation. | Ensure community facilities to support the development are provided. |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|---|---|-------|--|---|
| inclusion and to close the gap | Will the site result in a loss of a community facility? | | | |
| between the most | | | | |
| deprived areas | Is the site located in or | | | |
| within the plan | adjoining a deprived area? | | | |
| area. | | | | |
| 8. Transport To make efficient use of the existing transport infrastructure, help reduce the need to travel by car, improve accessibility to jobs and services for all and to improve travel choice and accessibility. | Is the site accessible by public transport? Is the site located in or adjoining the main built up area and has direct route(s) from the site to existing businesses and shopping centres? Is the site within 30 minutes public transport time of community facilities, schools, retail centres and employment areas? | ++ | The site has the potential to make use of existing rail infrastructure that serves the existing power station. This comprises a spur line of the neighbouring mainline railway. The site is not located in or adjoining the main built up area but the northern part of the site is adjacent (within 400 metres walking distance) of East Midlands Parkway Railway Station which provides direct rail services to Nottingham, London via Leicester and Sheffield via Derby and Chesterfield. This station will comprise the terminus for HS2 trains, which will continue at slower speeds to Nottingham, Chesterfield and Sheffield. The station also | Ensure development increases connectivity to the site by non- car modes of travel and improves networks for active travel by bicycle. |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|--|--|-------|--|---|
| | | | has a bus/coach stop with national and local services. The site is within 30 minutes travel time via train to Derby and within 30 minutes travel time to Nottingham by bus both cities offer a range of community facilities, schools, retail centres and employment | |
| 9. Brownfield Land To make efficient use of previously developed land or 'brownfield' land and recognise biodiversity value where | Is the site a brownfield site? | + | areas. The northern area is predominantly brownfield land. The southern area is predominantly greenfield. | |
| appropriate. 10. Energy and Climate Change To minimise energy usage and to develop low carbon energy resources and encourage | Will it improve energy efficiency of existing or historic buildings? Will the site include provision of renewable technology? | ++ | As a former power station, the existing electricity infrastructure on the site offers significant potential for the provision of renewable energy generation that connects directly to the National Grid. | Ensure development provides onsite multifunctional BGI that mitigates the effects and causes of climate change, including the provision of SuDS and priority habitats (that help to sequester carbon, provide shaded areas and reduce temperatures); |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|--|--|-------|---|---|
| nature-based solutions to climate change. | Is the site for a specific renewable energy? Is the site for the development of community energy systems? Will the site ensure that buildings are able to deal with future changes in climate? Will the site help people adapt to climate change? Will the site maintain or increase the provision of ecosystem services on which local people depend, including water, food, and materials, now and under future climates? | | The draft LDO focusses on the renewable energy and low carbon technology research and manufacturing industries. The site is not allocated for a specific renewable energy or community energy systems, but its proximity to East Midlands Airport, may limit the use/number of some renewables on the site. Solar panels have been proposed within the north of the site however. Whilst it is unknown if the allocation / redevelopment of the site would help people adapt to climate change, the development of renewable technologies will assist the reduction in climate change emissions. | encourages active travel rather than private car use; utilises building design that optimizes solar gain/shading and the uses renewable energy technologies (subject to the safe operation of East Midlands Airport being safeguarded) |
| 11. Pollution and Air Quality To manage air quality and minimise the risk posed by air, | Is site within the Nottingham Urban Area agglomeration zone? Will the site cause additional harm to an | ? | The site is not within the Nottingham Urban Area agglomeration zone. The site is not within or in proximity to an Air Quality Management Area. | Ensure development includes measures to reduce travel by car, by providing safe and secure active travel opportunities, access to public transport and provision of EV |

| Blue-Green Infrastructure To increase biodiversity levels and protect and enhance blue- green infrastructure and the natural environment. | Will it result in a loss of all or part of or impact on a designated site of nature conservation interest? Is the site adjacent to a designated site of nature conservation interest? Will it involve the loss of existing habitats or trees/ hedgerows/woodland or loss of connectivity? Will the site include the provision of on-site or off- site open space? Will the site involve the loss of existing open space? Will the site improve the underused or undervalued open space? | | Northern part of the site is adjacent to Thrumpton Park LWS and part of the southern part of the site adjoins the Kingston on Soar Copse LWS. The allocation / development of the site would result in the complete loss of existing habitats, primarily on the southern part of the site. The site is of sufficient size that there are potential opportunities to provide new areas of open space and BGI within the site and enhance existing woodland and grassland habitats within the Gotham Hills, West Leake & Bunny Ridge Line Biodiversity Opportunity Area (see appendix D of the Local Plan | enhances existing woodland and grassland habitats in line with the objectives for the Gotham Hills, West Leake & Bunny Ridge Line Biodiversity Opportunity Area. |
| 14. Landscape To protect and enhance the landscape character. | Will it have an adverse impact on local landscape character? Will it conserve, enhance or restore the features and | ? | Part 2). The site lies within the East Leake Rolling Farmland (DPZ NW02). The overall landscape strategy of the DPZ is to 'conserve and enhance'. The landscape condition of the | Ensure development proposals are supported by appropriate landscape character assessments and design and access statements specifically address landscape impacts. |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|---|---|-------|--|---|
| | characteristics of the landscape in the present form? | | DPZ is moderate and the landscape strength is strong. | Ensure development retains and utilises existing landscape |
| | Will it create a new landscape character? | | The existing power station on the northern part of the site has a significant impact on the local landscape and this could be enhanced by its removal, albeit new employment development would likely have its own landscape impact. By contrast the southern part of the site is largely open and development on this part of the site is unlikely to conserve or enhance the landscape in its present form. | features and incorporates BGI, sensitive design and layouts to reduce visual intrusion upon the landscape. |
| 15. Built and Historic Environment To protect and enhance the townscape character and enhancing the place through good design. To conserve designated and non-designated heritage assets | Will it result in development that is sympathetic to its surrounding in terms of design, layout and scale? Will it result in a loss of or harm the significance of designated or non- designated heritage asset(s) or its setting? | - | A part of the Roman site scheduled monument at Redhill lies within the northern part of the site, with the rest of the scheduled monument adjoining the part of the western boundary of the northern area of the site. Archaeological remains of an Iron Age Settlement at Redhill may extend into the northern part of the site in the northwest corner, albeit such remains are | Ensure further archaeological investigation is carried out across the site prior to development. Ensure the setting of the listed railway tunnels and Thrumpton Conservation Area is preserved. |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|---|---|-------|--|------------|
| and their setting and provide better opportunities for people to enjoy culture and heritage. | Will it enhance or better reveal the significance of the heritage asset? Will it promote heritage based tourism or heritage led regeneration? Will it lead to the adaptive reuse of a heritage asset? | | likely to have been heavily disturbed by previous development at / operation of the power station. The Grade II Redhill Railway Tunnel Portals (north and south) are also adjacent to the western boundary of the northern part of site. Records indicate the possibility of a moated manor house within the northeast corner of the northern part of the site. Assessment of A453 widening indicated possible Bronze Age, Medieval, Roman, and Iron Age archaeological remains in the vicinity of this corridor. | |
| 16. Natural Resources and Waste Management To prudently manage the natural resources of the area including soils, safeguarding | Is the site on high grade agricultural land:- - Grade 1 (excellent) - Grade 2 (very good) - Grade 3a (good) - Grade 3b (moderate) - Grade 4 (poor) - Grade 5 (very poor)? | | The majority of the site is classified as non-agricultural land, with four parcels of land (two on the northern and two on the southern) being sub- grade 3b and one small parcel on the southern side being sub-grade 3a. | |

RBC-L02 – Nottingham 'Gateway'

| Factors | Details |
|---------------------------------|-------------|
| Size | 168 ha. |
| Estimated employment floorspace | TBC |
| Existing Use | Agriculture |

Refer to matrix for scoring criteria.

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|--|---|-------|---|---|
| 1. Housing To ensure that the housing stock meets the housing needs, including gypsies, travellers and travelling showpeople. | Is the site allocated for housing? Will it meet the housing need? | 0 | No impact as the site is not currently allocated or used for housing and is proposed solely for employment or mixed-use development. | |
| 2. Employment and Jobs To create employment opportunities. | Will the site provide jobs? Will the site provide job opportunities for unemployed people? Will the site provide new job opportunities in areas of deprivation? | ++ | The site adjoins the strategic housing allocation south of Clifton (Policy 24 of Rushcliffe Core Strategy) and has the potential to provide a strategic level of jobs (approximately 8,340 assuming 50% reduction due to displacement and leakage), that could include opportunities for unemployed people. | Ensure development includes new employment opportunities for unemployed people. Require employment and skills strategy and apprenticeships for local people during construction. |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|---|---|-------|--|---|
| | | | The site is not within an area of deprivation. | |
| 3. Economic Structure and Innovation To provide the physical conditions for a modern economic structure including infrastructure to support the use of new technologies. | Is the site allocated for employment, retail or mixed use? Is the site allocated for specific employment uses e.g. office-based? Will the site involve the loss of employment, retail or mixed use land? Is the site for new educational buildings? | ++ | The site is not allocated for employment (etc) uses but is a single site greater than 5ha that adjoins the built-up area of Clifton and has the potential to provide a strategic level of employment. The development of the site would not result in the loss of employment (etc.) land. | The size of this site offers opportunities to include educational facilities and/or employment space for high knowledge sector. |
| | Is the site allocated for mixed live-work units? | | | |
| 4. Shopping Centres Increase the vitality and viability of existing shopping centres. | Is the site allocated for town centre uses or mixed use in the shopping centre? Is the site within 400 metres of a shopping centre e.g. city centre, district centre or local centre? | + | The site is not allocated for town centre use or mixed use in a shopping centre. Whilst the site is not within 400 metres of a shopping centre, it would be within a 30 minute travel time by public transport, walking and cycling of Clifton's shopping centre. | Consider limiting the number and type of town centre uses within the site, with retail floorspace limited to no more than 280 sqm (net) per unit. |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|--|--|-------|---|--|
| 5. Health and Well-Being To improve health and well- being and reduce health inequalities. | Will the site result in a loss of town centre use or mixed use in a shopping centre? Is the site within 30 minutes travel time of a health facility? Is the site within 400 metres walking distance of a recreational area or accessible blue-green infrastructure e.g. country parks, open spaces, playing fields, allotments, watercourses? Will the site result in a loss of recreational area or accessible blue-green infrastructure e.g. country | + | The site would not result in a loss of town centre use or mixed use in a shopping centre. The site is within 30 minutes travel time by bus, car and bicycle of the health facilities in Clifton. The site is not within 400 metres walking distance of a recreational area or accessible BGI. The site would not result in the loss of existing recreational open space or accessible BGI but there could be opportunities for new and enhanced BGI to be created that links with the Fairham | Ensure that development creates new multifunctional BGI networks that link to the Fairham Pastures development. |
| 6. Community | parks, open spaces, playing fields, allotments, watercourses? Will the site be designed to | ? | Pastures development. | Ensure policies in the Local Plan |
| Safety To improve community safety, reduce | contribute to a safe secure built environment through designing out crime? | | development upon crime is dependent upon design and a series of secondary factors not related to site allocation | in general promote a safe secure environment for new development |

| 9. Brownfield Land To make efficient use of previously developed land or 'brownfield' land and recognise biodiversity value where appropriate. | Is the site a brownfield site? | | Site is on greenfield land. | |
| 10. Energy and Climate Change To minimise energy usage and to develop low carbon energy resources and encourage nature-based solutions to climate change. | Will it improve energy efficiency of existing or historic buildings? Will the site include provision of renewable technology? Is the site for a specific renewable energy? Is the site for the development of community energy systems? Will the site ensure that buildings are able to deal with future changes in climate? | ? | Uncertain as the impact of development is dependent upon opportunities for either renewable energy provision or energy efficiency measures or nature-based solutions | Ensure development provides onsite multifunctional BGI that mitigates the effects and causes of climate change, including the provision of SuDS and priority habitats (that help to sequester carbon, provide shaded areas and reduce temperatures); encourages active travel rather than private car use; utilises building design that optimizes solar gain/shading and the uses renewable energy technologies. |

| SA objectives | Site criteria questions | Score | Commentary | Mitigation |
|---|---|-------|--|---|
| | Will the site help people adapt to climate change? | | | |
| | Will the site maintain or increase the provision of ecosystem services on which local people depend, including water, food, and materials, now and under future climates? | | | |
| 11. Pollution and Air Quality To manage air quality and | Is site within the Nottingham Urban Area agglomeration zone? | ? | The site is not within the Nottingham Urban Area agglomeration zone. | Ensure development includes measures to reduce travel by car, by providing safe and secure active travel |
| minimise the risk posed by air, noise and other types of pollution. | Will the site cause additional harm to an existing Air Quality Management Area? | | The site is not within or in proximity to an Air Quality Management Area. | opportunities, access to public transport and provision of EV infrastructure (including private and public car changing points). |
| | Is it likely to create a new Air Quality Management Area? | | It is unknown at this stage whether the allocation / development of the site would create a new Air Quality Management Area. | |
| 12. Flooding and Water Quality | Is the site within or adjacent EA Flood Zone:- - 1 (Low Probability); | - | The site is at very low risk of flooding (less than 0.1% each year) from rivers but parts of | Avoid where possible areas of surface water flood risk. |
| To minimise the risk of flooding and to conserve and improve water quality. | - 2 (Medium Probability); - 3a (High Probability); or - 3b (The Functional Floodplain)? | | the northern, eastern and western edges of the site that are at low, medium and high risk of surface water flooding. | Ensure surface water management/ mitigation measures including SuDS (limiting impermeable surfaces and promoting porous surfaces, |

| 14. Landscape To protect and enhance the landscape character. | Will it have an adverse impact on local landscape character? Will it conserve, enhance or restore the features and characteristics of the landscape in the present form? Will it create a new landscape character? | - | The site lies within the Clifton Slopes DPZ (SN01). The overall landscape strategy for the DPZ is to 'enhance'. The landscape condition and strength of the DPZ are both moderate. As with any development on a greenfield site, there is the potential for it to have some impact on local landscape character that is unlikely to conserve it in its present form, however, at this stage the severity of any impact cannot be determined. | Ensure development proposals are supported by appropriate landscape character assessments and design and access statements specifically address landscape impacts. Ensure development retains and utilises existing landscape features and incorporates BGI, sensitive design and layouts to reduce visual intrusion upon the landscape. |
