

ANNUAL REPORT OF THE SENIOR INFORMATION RISK OWNER 2022/23

1. Purpose of this report

1.1 This report provides a summary of Information Governance activity across Gedling Borough Council during 2022/23 in order to provide assurance that information risks are being managed effectively. The report also provides an update on the following:

- achievements for the period 1 April 2022 to 31 March 2023;
- the Council's compliance with legislative and regulatory requirements relating to the handling of information, including compliance with the General Data Protection Regulations 2016 (GDPR), Data Protection Act 2018 (DPA), Freedom of Information Act 2000 (FOI) and Environmental Information Regulations 2005 (EIR);
- data incidents relating to any loss or inappropriate access to personal data or breaches of confidentiality, and planned Information Governance activity during 2023/24.

2. Background

2.1 Information is a vital asset for the provision of services to the public and for the efficient management of the Council's resources. Without adequate levels of protection, confidentiality, integrity and availability of information, the Council will not be able to fulfil its obligations, including the provision of public services, or meet legal, statutory and contractual requirements.

2.2 There continues to be an increased threat of a cyber-attack, including the heightened posture recommend by the NCSC due to the war in Ukraine. An attack, if successful, will result in a significant impact on the Council's customers, staff and reputation. Most of the Council now relies on information technology on a day to day basis.

2.3 Information governance concerns the effective management of information in all its forms and locations, including electronic and paper records. It encompasses efficient ways of handling that information (how it is held, used and stored), robust management of the risks involved in the handling of information and compliance with regulatory and statutory guidance including the GDPR, DPA and FOI. Information governance is also concerned with keeping information safe and secure and ensuring it is appropriately shared when necessary to do so.

2.4 Senior Leadership approved an Information Security Governance Framework which was endorsed by Cabinet on 1 August 2019. The Director of Corporate Resources and s151 Officer is the designated Senior Information Risk Owner (SIRO). The SIRO is responsible for:

- Managing information risk in the Council.
- Chairing the Data Security Group.
- Fostering a culture for protecting and using information within the Council.
- Ensuring information governance compliance with legislation and Council policies.
- For risk at SLT level, ensuring that risk is properly identified, managed and that appropriate assurance mechanisms exist.
- Preparing an annual information risk assessment for the Council.
- Giving strategic direction to the work of the Data Protection Officer (DPO).

2.5 The Council is required to appoint a DPO and this role is currently designated to the Legal Services Manager position. The DPO is assisted by a Deputy being the Legal Officer: Litigation and Licensing.

2.6 The Council has a Data Security Group (DSG) in place, the membership of which comprises the Director of Corporate Resources (Chair), Head of Finance and ICT (currently vacant), Data Protection Officer or Deputy, and the Research and Development Manager (IT Support). The overarching remit of the group is to assist the Council to fulfil its obligations to appropriately protect paper and electronic 'data' and to ensure that everyone who has authorised access to 'data' is aware of their 'data handling' responsibilities.

2.7 The Council has a set of high level corporate policies in place which direct the Information Governance work. The key policies are:

- Information Security Policy.
- Data Protection Policy.
- Records Management Policy.
- Records Retention and Disposal Policy.
- Risk Management Strategy and Framework.

3. Information Governance/Security Training carried out

3.1 Prior to the COVID pandemic Data protection annual refresher training was delivered by the DPO and Deputy DPO via face to face corporate training sessions to both Members and staff across the Council. During the pandemic it was not possible to deliver training in this way. In order to maintain a training programme for data protection the DPO and Deputy DPO's created a virtual training programme accessible by all staff with computer access. The virtual training programme which consists of a video recorded training session followed by a short quiz was initially launched in December 2020. This remains the method of providing data protection training to Council Officers for 2022/23 and will likely remain for 2023/24 although provision will be reviewed on 2023/24.

The DPO and Deputy provided a face to face session with Members following the local election in May 2023. This session was recorded and has been provided to Members along with the training slides for those who were unable to attend the face to face session.

- 3.2 In addition to this where Departmental Representatives who are responsible for handling information requests have changed either due to restructure or staff departures, additional one to one training has been provided by the Deputy DPO via Microsoft Teams focusing on recognising and dealing with information requests and subject access requests and use of the Council's information request system.
- 3.3 Data Protection training is mandatory for all staff and forms part of the training checklist on induction. The virtual training package created by the DPO and deputy DPO is available on the Council's intranet and is accessible all year round for all staff including new starters. This training is to be reviewed in 2023/24. In terms of staff without IT access who do not process large amounts of personal data, training leaflets are provided.
- 3.4 The Council have continued to engage this year with the Nottinghamshire Information Officers' Group (NIOG) attending meetings which have been held on MS Teams. The group have assisted the Council in ensuring appropriate sharing agreements are in place using the NIOG template which is GDPR compliant. As part of the group Nottinghamshire County Council have created a MS Teams group and SharePoint site where all members of the group can access agendas and minutes of previous meetings and also share information and documentation.
- 3.5 Due to Covid 19 and other work pressures IT Support were unable to conduct any face to face or via Teams cyber security awareness training to officers in 2022/23 A briefing was given to Members however following the election in May 2023. Training materials for new starters and as refresher training for existing staff are however available on the Intranet. An online cyber security training course (including a quiz) from the National Cyber Security Centre (NCSC) has now been made available to staff alongside the existing training material and this will continue to be promoted during 2023/24.

4. Information Governance/Security Policy Review

- 4.1 The current Information Security Policy was originally approved by Cabinet on 4 April 2013 and has been subject to a number of amendments since then. A full review of the Information Security Policy was completed in 2022/23 but due to resource issues, the amended policy is being brought forward for approval to Cabinet in 2023/24 as part of this annual reporting process.
- 4.2 The current Data Protection Policy was approved by Cabinet on 28 June 2018 and amended in February 2019. An internal audit of the Council's IT Enterprise Architecture in 2021/22 recommended that the Data Protection Policy be reviewed which was done during 2022/23 with some minor amendments made particularly around the complaints procedure for handling of Subject Access Requests. The updated Policy was approved by SLT on 21st December 2022.

5. Requests for Information

- 5.1 The Council has an information request system for logging, monitoring and reporting on requests for information. The responsibility for managing information requests sits within Legal Services but every department within the Council has their own representative who can deal with requests for information on behalf of that department, provided the requests are straight forward and no exemptions or exceptions apply. Where a request is more complicated, exemptions/exceptions need to be applied or it is a council wide request this is responded to by a member of the Legal Services team.

6. Information/Security Incidents

- 6.1 In 2022/23, the Council has recorded 43 data breaches/incidents by council officers. No breaches were reported to the ICO as after investigation no risk to the rights and freedoms of an individual was identified.
- 6.2 The Council takes data breaches very seriously and has a robust reporting system in place to ensure compliance with the 72 hour reporting deadline. Reporting data breaches is something that is part of the corporate training programme but is also well publicised on the intranet, and through team meetings.
- 6.3 The breaches reported have been minor in nature and have largely been borne out of clerical error, for example the wrong addresses typed into systems which generates mail to the wrong address or multiple letters contained within one envelope. Staff have been reminded to check address details or update changes to addresses before sending out mail and to take care when posting external letters. Every incident is thoroughly investigated and wherever necessary, measures are put in place to reduce the risk of further incidents. To maintain corporate oversight, all incidents are reported to and considered by the DSG and DSG minutes are shared with Senior Leadership Team. No systemic failures have been identified.
- 6.4 The breaches reported have been minor in nature and have largely been borne out of clerical error, for example the wrong addresses typed into systems which generates mail to the wrong address or multiple letters contained within one envelope. Staff have been reminded to check address details or update changes to addresses before sending out mail and to take care when posting external letters. Every incident is thoroughly investigated and wherever necessary, measures are put in place to reduce the risk of further incidents. To maintain corporate oversight, all incidents are reported to and considered by the DSG and DSG minutes are shared with Senior Leadership Team. No systemic failures have been identified.
- 6.5 IT investigated 49 cyber security incidents last year. We are not aware of any successful Cyber Security Incidents involving Malware or Hacking in 2022/23.
- 6.6 77% of the security incidents involved phishing emails. This work is usually to inspect suspect emails, and sometimes to check for impacts of followed links. The Council continues to be subject to a large number of attempted phishing

attacks which are stopped by a combination of technical controls and staff vigilance. Cyber security training delivered to members as part of their induction post -election and the online cyber security training available to staff and members has also raised awareness in relation to potential phishing attacks.

7. Summary of key achievements in 2022/23

7.1 The key achievements in 2022/23 are as follows:

- ICT officers continue to be active members of the East Midlands Government Warning, Advice and Reporting Point (EMGWARP).
- Completed pilot to replace network switches with newer models.
- Began program to replace Windows Server 2012 with newer versions.
- Migrated Exchange Online away from older less secure email protocols
- Achieved PSN CoCo compliance.
- Maintained Payment Card Industry Data Security Standard (PCI DSS) compliance.
- Completed Windows 10 upgrade to version 21H2.
- Upgraded the virtualisation environment.
- Implemented automated patching system for 3rd party software.
- Migrated from Chrome Browser to Microsoft Edge, removed the less secure Internet Explorer.
- Councillor Cyber Security training was offered by East Midlands Councils in partnership with the East Midlands Special Operation Unit (Police).
- Continued to implement next generation firewall technologies, particularly to protect web servers.
- ICT Research and Development Manager continued continuous professional development to maintain CISSP cyber security certification.
- Commenced the annual review of existing Information Asset Registers and all Information Sharing Agreements.
- Completed administrative review of Information requests and updated departmental representatives accordingly.
- Adoption of the updated Contracts and Procurement Rules which specifically refer to the need for data protection clauses in contracts, where relevant.
- We seek to ensure records are deleted when appropriate which is an ongoing task.
- GDPR mandatory training continues to be available to all staff.
- The Data Protection Policy was reviewed and updated.

8. Plans for 2023/24

8.1 The following activity is planned for 2023/24:

- A review of Council's policies to ensure they remain fit for purpose, including: the Risk Management Strategy and Framework; the Information Security Policy; and the Records and Retention Policy, for presentation to Cabinet for approval.
- Replace network switches in the Civic Centre.
- Refresh backup infrastructure with newer software and hardware and

implement Office 365 backup and recovery following approval of service development bids to enhance cyber security and disaster recover measure

- Continue to work on replacing Windows Server 2012 which end support in October 2023.
- Start working on replacing legacy analogue telephone lines due to Public Switched Telephone Network switch off by BT running until 2023.
- Manage national shutdown of 3G mobile network.
- React to any requirements from the Department for Levelling Up, Housing and Communities (DLUHC) related to the Local Government Cyber Assessment Framework
- Public Sector Network (PSN) compliance to be maintained.
- Removal of PSN network should the DWP remove the final services we use which relate to Housing Benefit functions.
- Improve the cyber security risk register.
- Conduct IT Disaster Recovery Rehearsal and implement recommended actions.
- Review Business Continuity Plans across the organisation to ensure they are fit for purpose in the event of a cyber security incident.
- Conduct a phishing exercise.
- Annual review of Information Asset Registers (IARs) to be conducted.
- Virtual GDPR training to continue to be delivered to staff and to be reviewed.
- Face to face training to be provided to Members following the local elections and session to be recorded and provided to all Members (now completed).
- Continue to complete reviews of Data Protection Impact Assessments (DPIAs).
- Ensure continued compliance with GDPR in terms of breach reporting, DPIAs, updating IARs and ensuring privacy notices are up to date.
- An audit and review of the Council's Data Protection compliance and information governance is schedule to take place in quarter 3 of 2023/24.

9. Risk

- 9.1 It must be recognised that information governance and cyber-attacks are significant risk areas for all organisations locally, nationally and globally. The risk of accidental data loss, physical system failures and direct malicious cyber-attacks are an ongoing concern for the Council requiring continuous focus.
- 9.2 The Council has a corporate Risk Management Strategy and Framework in place. A number of risks relating to Information Governance have been recorded on departmental risk registers and the corporate risk register also includes a strategic risk of "Failure to properly utilise existing ICT, react to technology changes, and prevent data loss". The risk registers are reviewed on a quarterly basis and updates reported to both SLT and Audit Committee. In respect of the main corporate risk: *Failure to properly utilise existing ICT, react to technology changes, and prevent data loss*, as reported to Audit Committee at the end of 2021/22, the risk rating was amber. Among the outstanding actions is the development of the cyber risk register which is now planned for 2023/24.

- 9.3 The corporate risk register also includes a risk of '*Failure to react to changes in legislation*', under which the progress to ensure compliance with the General Data Protection Regulations and Data Protection Act 2018 has been tracked. An audit of the Council's Information governance is due to be undertaken in quarter 3 of 2023/24.
- 9.4 A further IT cyber risk audit was completed in March 2023. The findings were reported to the Audit Committee in July 2023.

10. Conclusion

- 10.1 The Council has a healthy culture of breach and incident reporting which needs to continue to ensure incidents are investigated, reporting requirements to the ICO are complied with and importantly, remedial action taken. Good progress has been made in improving information governance processes and maintaining GDPR compliance. The Council needs to continue with its robust and pro-active approach to the management of personal data.
- 10.2 The Council has robust cyber security arrangements in place and it is crucial that these are not only maintained but also continue to evolve to meet the cyber security challenges of today, and tomorrow. The incidents have demonstrated that robust security measures are in place to protect the council underpinned by robust processes and officer capability to deal with this type of unexpected event. However, the Council cannot stand still: continuous improvement needs to be made and cyber security must remain a priority.
- 10.3 Pressure and demand on ICT continues to grow, which presents a risk to maintaining appropriate security arrangements. A new, internal Digital Transformation team has been established to work with an external company to develop an IT Strategy and recommended operating model for ICT going forward.
